

Pacmachine awards for ACG packaging products

21 January 2013 | News | By BioSpectrum Bureau

Mumbai: ACG Worldwide has won recognition for multiple products at the Pacmachine 2012 awards. Organised by the Indian Institute of Packaging, the awards are given to products that demonstrate innovative concepts in design and development of packaging machinery for the pharma industry.

The award will be presented on January 29, 2013, during Indiapack 2013. Three entries of ACG Worldwide have been selected for the prestigious award, including Verif-i and B 45.

Verif-i is a track and trace solution for packaging machinery from ACG Inspection System that helps companies to inspect blister cartoning, bottling, vial and ampoule filling lines, and pouch packs, among others, which helps them protect their brands in real-time.

B 45 is a high-speed rotary sealing flat bed blister packaging machine from ACG Pampac Machines that operates at 45 cycles-per-minute for PVC-ALU blisters and 35-cycles-per-minute for ALU-ALU blisters with the large format area. Integrated with a camera system for online blister inspection, the machine helps the pharma industry meet GMP and regulated market audit needs.

FLUIDOCAP 1000: a machine featuring a revolutionary encapsulation technology for liquid and pastes from ACG Pam Pharma Technologies. FLUIDOCAP 1000 provides precision encapsulation of liquids and pastes into hard gelatin capsules. It also offers band-sealing to prevent leakage and tampering.

"We are honoured to win the PACMACHINE 2012 award for packaging excellence," said Mr Ajit Singh, chairman, ACG Worldwide. "The three award-winning machines exemplify ACG's relentless pursuit of constant innovation and breaking new ground with manufacturing, packaging, R&D solutions to the global Pharma industry. It gives immense satisfaction to everyone at ACG to see our solutions help make better quality drugs, more efficiently and cost-effectively."
